Student Worksheet Companion

Student Name: 趙婉彤

Instructions: Draw a visual representation of an array structure that can hold 8 integers. Include:

Index labels (0 through 7)

Complete your populated array here:

Instructions: Fill the array structure you drew in A1 with the given integers: 22, 90, 95, 100, 71, 19, 5, 70

Array name (e.g., "Array A")

Value labels above or inside each cell

Instructions: Show the detailed execution of the first three iterations of selection sort. For each step, track the array state, identify the minimum element, record any swaps performed, and show the resulting array.
